

Improving Geriatric Care by Reducing Potentially Avoidable Hospitalizations

Third National Medicare Readmissions Summit Mini-Summit III: Successful Provider Initiatives

Laurie Herndon, MSN, GNP-BC, ANP-BC Director of Clinical Quality Massachusetts Senior Care Foundation Iherndon@maseniorcare.org

Goals For Today

- Provide a very brief background of the problem
- Review the purpose of the INTERACT II toolkit
- Give an overview of some key tools
- Share lessons learned
- Discuss INTERACT II in context of other initiatives

The INTERACT Interdisciplinary Team

- Joseph Ouslander, MD
- Gerri Lamb, RN, PhD, FAAN
- Ruth Tappen, RN, EdD, FAAN
- Sanya Diaz, MD
- Alice Bonner, RN, PhD
- John Schnelle, PhD
- Sandra Simmons, PhD
- Annie Rahman, MSW
- Jo Taylor, RN, MPH

Excellence

IN COLLABORATION WITH PARTICIPATING NURSING HOMES

Hospitalizations of NH residents are common

N Engl J Med 2009; 360:1418-28

- 1 in 5 Medicare fee-for-service patients admitted to an acute hospital are re-admitted within 30 days
- In any six month period, more than 15% of long stay residents are hospitalized
 - O Intrator, J. Zinn, and V. Mor, "Nursing Home Characteristics and Potentially Preventable Hospitalizations" Journal of the American Geriatrics Society 52, no. 10(2004): 1730-1736

Hospitalization of Nursing Home Residents is Costly

In 2004 in NY, Medicare spent close to \$200 million on hospitalization of long-stay NH residents for "ambulatory care sensitive diagnoses"

Grabowski et al, Health Affairs 26: 1753-1761, 2007

Many Hospitalizations Are Avoidable

As many as 45% of admissions of nursing home residents to acute hospitals may be inappropriate Saliba et al, J Amer Geriatr Soc 48:154-163, 2000

Improving Geriatric Care

A Toolkit to Improve Nursing Home Care by Reducing Avoidable Acute Care Transfers and Hospitalizations

The INTERACT II Tools, educational materials, and implementation strategies were developed by Drs. Joseph Ouslander, Gerri Lamb, Alice Bonner, and Ruth Tappen, and Laurie Herndon with input from a variety of direct care providers and national experts in a project supported by the Commonwealth Fund based at Florida Atlantic University.

Initial versions of the INTERACT Tools were developed by Dr. Ouslander and Mary Perloe, MS, GNP at the Georgia Medical Care Foundation with the support of a special study contract from CMS.

Purpose of Toolkit

- Aid in the early identification of a resident change of status
- Guide staff through a comprehensive resident assessment when a change has been identified
- Improve documentation condition
- Enhance around resident change in communication with other health care providers about a resident change of status

Design of Toolkit

- Dr. Ouslander "Simple Test"
- Feasible and efficient
- Part of the "way we do business"
- Acceptable to staff

What Is Missing Here?

Goals/language aimed at reducing ALL transfers

Why?

Organization of Tools in Toolkit

Communication Tools

Clinical Care Paths

Advance Care Planning Tools

Improving Communication Internally

EARLY WARNING TOOL

"Stop and Watch"

If you have identified an important change while caring for a resident today, please circle the change and discuss it with the charge nurse before the end of your shift.

Name of Resident

Seems different than usual T alks or communicates less than usual
Overall needs more help than usual
Participated in activities less than usual
Ate less than usual (Not because of dislike of food) N Drank less than usual
Weight change
Agitated or nervous more than usual
Tired, weak, confused, or drowsy
Change in skin color or condition
Help with walking, transferring, toileting more than usual
Staff
Date / / Time

QUALITY IMPROVEMENT TOOL

The goal of this tool is to review transfers in order to identify opportunities to improve the identification, evaluation, and management of changes in resident condition and other situations that commonly result in transfers, and when feasible and safe, to prevent transfers to the hospital. This tool is intended to be completed retrospectively after the transfer to look back and identify opportunities for improvement in reducing preventable transfers.

Section 1: BACKGROUND INFORMATION Unit/Room # Resident's Last Name First Name a. Date of most recent admission to nursing home: b. Resident hospitalized in the past 12 months? □ No □ Yes If yes, list dates and reasons below: Section 2: DESCRIBE THE ACUTE CHANGE IN CONDITION THAT LED TO TRANSFER Date the change in condition first noticed: a. Check all that apply: NEW CONDITION: NEW SYMPTOM(S)/SIGNS OF: OTHER CHANGE: CHANGE IN: ☐ Bleeding ☐ Appetite/intake ☐ Altered mental status ☐ Abnormal lab value(s) ☐ Breathing difficulty or SOB ☐ Behavior ☐ Congestive heart failure ☐ Abnormal vital signs ☐ Function □ Constipation □ Dehydration ☐ Family concern ☐ Skin or a wound ☐ Diarrhea □ Fever ☐ Other (specify) □ Fall ☐ Lower respiratory infection ☐ Pain (new or worsened) ☐ Urinary tract infection ☐ Other (specify) b. Briefly describe the symptom, sign or change in condition that led to the transfer:

Building Evidence

- CMS Pilot
 - 50% reduction of hospitalization in 3 NHs with high baseline rates
 - 36% reduction in hospitalizations rated as potentially avoidable
- Commonwealth Fund Project
 - 17% reduction all facilities
 - 24% reduction in highly engaged facilities
- Practice Change Fellowship
 - 100+MA facilities
 - Data from ~30

Anecdotal Evidence

"I love this project!

I love that it's short on rhetoric and theory and focuses on tools and I especially love the flexibility you've given facilities to tailor it to their needs"

INTERACT Champion

Lessons Learned

- Commonwealth Fund Project training and implementation strategy effective
- Others have implemented on their own
- Leadership matters
- Front lines are where it happens: The Champion is KEY
- Relationships matter
 - Medical Director
 - Nurse Practitioners
- Important foundation for relationship with the hospital

Lessons Learned

- It can be done
- Allow 3 months to get started
- Anticipate questions
- Promote as integrated set of tools
- Anticipate enthusiasm
- Be ready for refining and critical thinking at 12-18 months
 - Ex. Cross Continuum Team →
 - Transfer Form
 - Post Acute Checklist

INTERACT II in Context of Other Initiatives

- MA Statewide Strategic Plan for Care Transitions
- STAAR Project
- Cross Continuum Teams
- MOLST/POLST
- Accountable Care Organizations
- Universal Transfer Form
- Blue Cross Blue Shield of MA
- MA Department of Public Health
- CMS Care Transitions in 10th Scope of Work
 - INTERACT listed in "Resources for Providers"
